01/12/07**Power Car Notes...**

By way of a farewell to the Valenta FGW turned out 43002 and 43003 (both EFPC) either end of an un-refurbished coaching set bearing their original cab end numbers 253001. Although these are likely to see further use in traffic their days are numbered and a trip to Brush for the remaining FGW Valenta quartet, 43002 43003 43015 and 43034, will be sooner rather than later. Not recorded so far was the release from Loughborough following re-engineering of 43041 and 43146 on the 29th which were transferred west with 43004. 43115 (IECP) was admitted to Brush Traction yesterday, it was escorted in by 43044, swapping places with 43313 (IECP) being released from re-engineering which took 43044 back to Neville Hill.

Class 87 Notes...

87022 and 87028 (both GBAC) have been assigned for N ONE at Wembley on the 31st after bringing the curtain down for the Class in the UK with the farewell tour between Birmingham and Glasgow and back on the 29th.

Tour 87 (now singular)...

Tomorrow's Class 87 farewell tour between Birmingham and Glasgow is now set to feature just 87022 as 87028 has been retired for store at Wembley. 87028 (GBAC) worked south from Scotland yesterday with a mail train routed via the ECML due to the WCML engineering blockade south of Birmingham, and was A ONE at Willesden this morning awaiting transfer across to Wembley and store. 87022 (GBAC) worked north with a mail train yesterday, via the ECML, and was at Warrington this morning later running south to Oxley ready for the finale tomorrow.

HNRC Notes...

The sale of 56128 to Hanson Traction is now complete paving the way for it to be transferred from Long Marston to Wansford for repairs whilst Barrow Hill resident 37079 has also been sold on. One that should probably have been re-listed as stored some time ago its future is secured and following a bogie change 37079 is expected to leave Barrow Hill for pastures new. Heading for Barrow Hill in the new year will be 37372 from Kingsbury from which, during component recovery, the power unit

is to be extracted and made available for purchase. 20088 at Long Marston and 37672 at Barrow Hill are also being made available for purchase, details in the 'for sale' section.

Cock up o' the North...

Today's Class 87 farewell tour, the Electric Scot from Birmingham to Glasgow and return, hasn't run. Irresolvable problems with the stock at Oxley saw the tour being cancelled at Wolverhampton, the by then revised start point, after 87022 (GBAC) and stock had run ECS to Wolverhampton via Bescot and Soho. 87028 (GBAC) has been stopped N ONE at Willesden Mail Terminal pending transfer across to Wembley.

Leg Out...

Stopped at Margam awaiting the inevitable 60058 (WCBN) suffered a major engine failure whilst working this morning's 6H23 Margam to Llanwern.

Test...

37423 (XHNC) undertook a test run from Kingmoor to Shap and back yesterday with 66406 along for insurance.

WBEN Update...

Since the last review 66033 has been sent back to France from Toton. 66072 remains at Dollands Moor whilst troublesome 66234 has been to France but was back in the UK, at Dollands Moor, on the 27th. Crewe EMD still has 66195 66203 66224 66225 66242 and 66247 being prepared for use in Europe.

30/12/07

401 / 410...

Undergoing maintenance at Toton 37401 (WNTS) is being prepared for a return to service as a replacement for 37410 (WKBN) which has to come out of service tomorrow due to not being equipped with OTMR. 37410 was at Warrington today assigned for N ONE at Toton tomorrow.

Disposal...

A little belated this one but 08942 has been disposed of at Thomson's, Stockton and as far as can be ascertained it was scrapped during November. 08942 was stored from Cardiff Canton and the LNWK pool back in May 1998, RIP.

Year End Round Up, OTMR Issues and Freightliner Hand Backs...

As it's nearly the end of the year it's time to have a look at those locomotives that technically should have been added to the storage lists at some point in the past 12 months or so but have so far managed to evade addition. This year's crop include 33202 and 47714 sidelined at Loughborough, 47316 laid up at Gloucester and 73114 which hasn't been out since being returned from CTRL duties a couple of months ago. Also added / re-listed are 57007 57010 and 57012 which DRS haven't used since taking them on from Freightliner in May. Three further additions to the storage lists which should have featured in the round up at the end of last year are 37214 at Carnforth, out of use since summer 2006, 57001 sidelined with a serious engine fault last December and 66031 in bits at Toton since August 2006.

Obviously with the OTMR deadline looming large a number of locomotives not yet fitted with said equipment are going to be forced off the mainline and this situation will be monitored for developments whilst Freightliner are preparing to hand the five 'operational' Class 57s back to Porterbrook and these have been stopped; 57002 and 57006 at Crewe, 57003 57004 and 57005 at Southampton, pending their release. The four Freightliner Class 47s are also due to come out of traffic by tomorrow due to not having OTMR but there is a school of thought that one or two examples may still see use as yard 'super shunters', a duty already being undertaken by 47830 at Garston and 47841 at Dagenham anyway. 47811 and 47816 were to be found on Crewe Basford Hall this weekend.

31/12/07

401 / 410...

37401 at Toton has been reinstated to the WKBN pool swapping places with 37410 which has been stored WNTS at Toton. It ran light engine from Warrington today.

Freightliner 57s...

On transfer to Basford Hall from Maritime and scheduled to go 'dead in tow' 57005 (DFTZ) powered the 4E76 from Southampton as far as Crewe last night where it joins 57002 and 57006 (both DFTZ), the latter of which is booked for transfer across to LNWR. *Rumours* circulating imply that 57001 and 57006 have been earmarked for transfer to Cotswold Rail.

MTU...

43041 (EFPC) has been noted back in traffic following re-commissioning at Landore meanwhile 43002 and 43003 (EFPC) are still in traffic evading the call to works for conversion.

Transfers on the 2nd...

Wimbledon resident 73201 (HYWD) is scheduled to be dragged to Long Marston for storage on January 2nd whilst DRS are to bring 87022 (GBAC) south from Oxley back to Wembley.
